To install the EZUpload Client:

1. **Identify if your *Windows PC based computer is 32 or 64 bit:**
   *Many agencies run EZUpload Client successfully on a MAC, OSX or Chromebook environment by using a virtual emulation of Windows through a program like Parallels for Mac.
   Windows 7
   - Click the **Start** menu at bottom left corner.
   - Right-click **Computer** and select **Properties**.

   Windows 8 or 10
   - Point your mouse at the lower-left corner of the screen and click **Search**.
   - Type **system** in the search box and click **Settings**>**System**.
   - See **System Type**.

2. Close your management System.
3. Click the appropriate link: **Install on 32-bit system** or **Install on 64-bit system**
4. Follow instructions for your browser (see next page).

For **Internet Explorer**, click **Open**.

For **Chrome**, click **download file** at lower left of computer screen.

5. Wait for download, then click the **EzPDFUpload Setup** option.

6. Click **Run** and follow the installation wizard.

Basic instructions - contact your management system for detailed instructions for their system.

1. Select an **ACORD 80 or 90** in your management system, and click the **Print** button.
2. Select the **EZPDF Upload Printer** from printers.
3. In the pop-up box, enter your EZLynx username and password (required first time only).
4. The new applicant is created in EZLynx.
   NOTE: If the applicant already exists in EZLynx, you'll land on a Merge Applicant screen instead.
